

Welcome address to the participants, visitors and organisers
of the RosBuild 2019 International Exhibition

Dear colleagues,

I am glad to welcome the participants, visitors and organisers of the RosBuild 2019 International Exhibition for Building and Finishing Materials and Technologies.

The Russian networking platform uniting different segments of the building industry is relevant now more than ever. RosBuild attracts manufacturers, architects, builders, and customers to Expocentre Fairgrounds. It allows exchanging breakthrough ideas, creative concepts, and best practices, reaching global goals, and influencing urban and architectural future of this country.

Modern Russian-made materials in conjunction with the projects of Russian architects provide a strong impetus to develop the building industry. Quality construction, energy efficient and eco-friendly technologies is one of especially important challenges whose solution helps to create comfortable and favourable environment.

Any Russian city should be comfortable for living, working, and resting and we should create conditions to improve our environment. RosBuild allows showing enormous potential of the Russian construction industry, new materials, unique technologies, and best design solutions to introduce in practice.

I would like to wish all RosBuild 2019 participants vivid impressions, fruitful discussions, and effective work!

Nikolay Shumakov
President
Union of Architects of Russia
