

Dear colleagues,

On behalf of the Association of Manufacturers of LEDs, I would like to welcome the exhibitors and visitors to Russian Construction Week 2020 and the RosBuild 2020 International Exhibition for Building & Finishing Materials and Technologies.

Over several years, our association has successfully developed regulations for lighting engineering and promoted better quality and safety of lighting products and reliability control. The prerequisites of the industry's sustainable and long-term growth are the setting of standards and greater cross-industry collaboration.

Russian Construction Week and RosBuild are an efficient networking platform and an opportunity to be heard by the authorities, cooperate with professionals from allied markets, and interact with development institutions and potential clients.

Participation in Russian Construction Week enables LED technology companies working in the construction industry to expand business scope, raise the profile in the business community, and generate new partners. The exhibition's events and activities offer great opportunities to find new approaches to difficult problems and relevant issues.

I am positive that Russian Construction Week gives construction industry professionals every chance to expand and strengthen business ties and to join our efforts to develop the industry. I would like to wish all exhibitors and visitors fruitful work, every success and brilliant results.

Best regards,

Olga Grekova
Director General
