

Welcome Message to the organizers, participants and visitors of the Russian Construction Week and International Exhibition RosBuild 2020

Dear friends and colleagues,
I would like to welcome the organisers and participants in Russian Construction Week and the RosBuild 2020 International Exhibition for Building & Finishing Materials and Technologies at Expocentre Fairgrounds.
Last year Expocentre launched a unique project Russian Construction Week reflecting current trends in the construction industry. The formation of modern infrastructure necessary for comfortable life depends on the industry.
I am confident Russian Construction Week and RosBuild 2020, where exhibitors showcase the latest construction equipment and products and innovative construction technology, will serve to implement priorities of the Housing and Urban Environment national project and to develop the construction business in Russia.
The project will bring together construction companies from many regions of Russia allowing to increase the potential of the domestic construction industry.
I am glad that representatives of big, medium and small businesses, relevant federal and regional authorities, national associations, public and self-regulatory organisations of the building sector, and universities and

colleges will meet once again at the Week's supporting events to discuss innovations in the construction industry and make suggestions on solution to the current challenges.

On behalf of the Russian Chamber of Commerce and Industry and on behalf of my own I would like to congratulate the organisers and participants and wish everybody productive discussions, new business partners, and conclusion of contracts!

Sergey Katyrin
President
Chamber of Commerce and Industry
of the Russian Federation
