

## Welcome Message to the organizers, participants and visitors of the Russian Construction Week and International Exhibition RosBuild 2023

**D**ear exhibitors and visitors to Russian Construction Week 2023 and the RosBuild 2023 International Exhibition for Building and Finishing Materials and Technologies, I would like to welcome you to EXPOCENTRE Fairgrounds and these flagship events of the Russian construction industry! In the 2023 season, Russian Construction Week and RosBuild will traditionally showcase products from Russian and foreign companies producing construction equipment and materials, and innovative developments designed for use in construction. It will no doubt help to expand business contacts between manufacturers, suppliers and consumers in the construction industry.

RosBuild 2023, as a central event of Russian Construction Week 2023, is held with support of the Russian Ministry of Construction, Housing and Utilities, the Russian Ministry of Industry and Trade, the Moscow City Government, the National Association of Home Builders, the Aluminium Association, NOSTROY, the Russian Union of Designers and ERZ.RF, and under auspices of the Russian Chamber of Commerce and Industry.

RosBuild 2023 will demonstrate various aspects of modern construction from the use of BIM technologies and IT solutions in design to the use of the latest advanced building and finishing materials and engineering systems. The Salon of Low-rise House Construction is becoming increasingly popular with visitors and will be further developed. Leaders of green construction will showcase their projects on the Energy-efficient Construction and Technology platform that is organised by Passive House Institute.

The conference programme of Russian Construction Week 2023 will offer its participants every opportunity to discuss the most relevant objectives of the industry.

The agenda includes issues of state support measures for the construction industry, development of infrastructure for new territories, the end-to-end digitalisation of the construction industry, and many others.

A special feature of the 2023 season will be a significant expansion of Russian Construction Week, which this year will include the Mir Stekla International Exhibition for Glass Products, Manufacturing, Processing and Finishing Technologies. This great addition will increase the range of construction products on display and bring in an even wider professional audience.

On the whole, Russian Construction Week 2023 and RosBuild 2023 will create a good groundwork for maintaining and strengthening positive trends in the Russian construction industry, provide a direct dialogue between business and the government, which continues to act as the largest customer of construction projects, and give the green light to a new round of innovative development in the construction industry.

I wish all the exhibitors and visitors to Russian Construction Week 2023 and RosBuild 2023 excellent work results, new business partners and promising contracts!

**Alexey Vyalkin**
