Marat Khusnullin
Vice Prime Minister of Russia

"Together we can improve the lives of the people and increase the contribution of the construction industry and the housing and utilities sector to the development of the country, but everyone's participation is needed to achieve these goals. Events such as Russian Construction Week are one of the ways to share experience and encourage professional dialogue."

Russian Construction Week

1,342
real estate developers from

69
Russian regions

Cumulatively, these companies account for

60.1%
of Russia's apartment block construction sector

Denis Fursov,
Sales Director at YTA

"Mir Stekla is our regular and most favourite exhibition. This exhibition attracts the most attention and brings together the most customers and, accordingly, brings the largest number of useful meetings with which we work for a whole year. It's all Mir Stekla. We always show up with a big stand as the largest machine tool company in the industry."

Sofia Shaibakovich,
Marketing and Advertising Specialist at PSI

"The density of meetings is very high. Compared to previous years, the attendance of our stand has increased several times. Therefore, a stand of 78 square metres is no longer enough for us. Next year we will have to take more. There is room to grow."

Semyon Klyugin,
Director at IMG Lighting in Russia

"This is the third time that we participate in RosBuild, and each time we realise that the exhibition gives us a large number of new customers. I can say that we have almost doubled our turnover in the past 2023. It shows that the market is very vibrant, very alive, because we are part of the construction industry."

Konstantin Gusev,
Senior Technical Coach at EKF

"This is the first day of the exhibition but we have already had interesting contacts with representatives from Kazan, with chief power engineers who were interested in the possibility of replacing European brands with our equipment."
